

## INTRO TO T-Shirt Quilting

This class is to help you get started making a T-shirt Quilt.

There will be no sewing, but pressing will be done. I will bring my presser.

**Bring to class:** Scissors, rotary cutter, pressing cloth, rulers or pre-sized squares, cutting board, and fusible interfacing (stabilizer). The two weights I like are Pellon Sf101 (that is cotton) or 911ff. Both are pliable and still do the job.

**PREPARATION OF SHIRTS:** All t-shirts must be washed. NO FABRIC SOFTENER is to be used!

Number of shirts: This depends on the size of the quilt and the size of your blocks. For example, 15 t-shirts with a finish of 12" , and using 3 ½ inch sashing, with a finished 6 inch border will have a finished size of approximately 54" x 84". Twenty (20) tee shirts, using the same size squares and sashing will have a finished size of 74 inches by 89 inches.

### **DO NOT CUT YOUR SHIRTS BEFORE CLASS**

After our session, you will be leaving with at least one prepared t-shirt and confidence to do your quilt.
